# Grimsby Blood Will Save Soldiers' Lives

What Blood Will Do

Pte. Chris Ellis of Toronto, badly burned and shocked during a bombing raid overseas, receives a blood serum transfusion in a Canadian military hospital in England. Major S. D. Gordon, Toronto, administers the transfusion, assisted by Lieut. (Nursing Sister) E. R. Campbell, Edmonton. The dried blood serum, collected and processed in Canada through the Canadian Red Cross, is bottled and packed in the airtight tins shown on the bedside table and sent overseas where it is available for Canadian and British servicemen. Supplies have also gone to Malta, Libya, Egypt and other Middle East theatres of war. Canadian blood serum, released through the Canadian Red Cross, also saved the lives of thousands of British civilians injured in the battle of Britain,

### HE'S HELPING YOU;

I received a letter from overseas the other day.

Of all the letters that I have received from all corners of the earth in the past 40 years, I appreciate this one more than all of them.

It was from Clifford McCartney, (Popto me), overseas now well over two years. With a lovely wife and a beautiful daughter, with her pig-tails hanging down her back, carrying on here at home.

To the uninitiated, he was a son of the late Charlie and Elizabeth McCartney, honored citizens of Grimsby for many years. A brother of Miss Margaret, Chief Operator of the Bell Telephone Co.

"Pop" was a kid that came up in Grimsby. A Smile on his mug and a disposition that was full of sunshine for somebody else. That is why he is in uniform. For somebody else.

The world was wide in his estimation and everybody had a right to live. A right to Liberty and Freedom without pain, agony and sacrifice. He backed his belief by voluntary enlisting. I look for good reports from this "kid" when the time comes for he and his brother Canadians go into action.

When that time comes "Pop" and his pals will need plenty of help from the Red Cross. Are you going to help the Red Cross to help "Pop".

Not only "Pop" but all the other Grimsby boys on the land, in the air and on the sea. There is not a battle front in existence today that a Grimsby boy is not on. The Red Cross is there with him. It is up to you to keep the Red Cross there with him and all the other Canadians, Yankees, Russians, and Allied fighting men.

Where Humanity exists the Red Cross exists there too.

### I HAVE ENOUGH TO DO AT HOME

A man said to me on the street the other day "why don't you go after Mackenzie King. Premier Conant and ex Provincial Treasurer Hepburn, on this jangle that they are in over revenues and other questions." I replied, it revenues and other questions." I replied, it is not my place to go after any of those men on any question.

That may sound like this column and this paper was falling down on the job. Such is not the fact.

This paper and the writer of this column believe that there is enough work the betterment of done here at home for the betterment of Grimsby and North Grimsby and West Lin-Grimsby and North Grimsby and West Lincoln as a whole, without sticking our nose, our neck or even our whole carcass out.

Let the big dailies look after the national and international situation. The weeklies will take care of the hinterland and take lies will take care of the hinterland and take care of it better than the dailies could. They care of it better than the dailies could. They care not horning into our field. Why should are not horning into our field. Why should we with the infintisimal squeak that we could put up in the turmoil, butt into their field.

It is a good newspaper that knows enough to take care of the people that it serves. In these tough times they have got to be good. They cannot go wandering afield.

The dailies of Canada are doing an admirable job, despite all the obstructions that have been strewn in their path. The weeklies are doing a better job, despite obstructions,

Both ections of Canada's newspaper field will do a real job, obstructions or no obstructions. But there are a lot of weeklies that do not know enough for their own good, to keep out of the daily field. That is why they are in trouble with their own readers. Readers like the gentleman who asked the above question.

Once and for all, The Independent is Grimsby and North Grimsby FIRST, West Lincoln, second, and the County of Lincoln, third. After that, if the necessity arises, we will pop to the surface and put anybody on the spot or the griddle according to how it all affects Grimsby and Lincoln county.

### SELF-PORTRAIT OF A FANATIC

I am a fanatic. I am as fanatical as I ever was. I shall be a fanatic as long as I live. The party I founded to do my will learned its fantaticism from me. What will-power in the world is equal to my will-power? In the period of my struggle for power every success of my struggle for power, every success of my enemies, made me grit my teeth more firmly.

The obstacles, victories and sorrows I have survived would have broken less strong characters. Destiny has chosen me to break terror with tenfold terror. I am a fanatic.

No schoolboy would need three guesses to name the man who talks like this, says The New York Times. The world is so accustomed to his ravings that it hardly listens any more. Yet as we go deeper into the horors of this war it is more horrifying, more incredible, that a man speaking in the name of a great country, controlling the life of a great continent, could broadcast such a manifesto of madness as Hitler's latest pronouncement in this paean to his owr anaticism, in these boasts of his own strength, we hear his "voice", almost forgotten in the rationalized movements of his war machine, rising again to a crescendo of eerie and irrational violence.

He is no more insane today than he was in the beginning. But to read in the lurid light of events the message he sent to his followers on the twenty-third anniversary of the founding of the Nazi party, is to get a new and sickening sense of what it means to let a fanatic loose in the world.

The state of Europe today is a monument to this fanaticism. Blasted cities, starved children, the spectral life of ghettos and prison camps, the epidemic of savagery and hate, are its legacy.

The mind of Germany and all the nations it has conquered will be warped for a generation by the workings of this twisted brain. Because of this fanatic, American boys are dying in Tunisia. It was he who challenged the might of Russia and started the westward march of the Red Army. He gave the signal to the Japanese and set the East on fire. And then, looking upon his work, he glories in his fanaticism flow long can the madman celebrate his madness?

### ADVANCE AGENT FOR SPRING

He's here! It's that bird again. He always comes like that—suddenly, out of nowhere. Now, if he'd only give us warning, we could have things ready. That shabby white carpet on the lawn. It's really disgracaful. But we could have whisked it away, had we known, and smoothed a nice landing field for him.

And here we are without a worm in the house! It would have been simple to defrost a couple had we known company was coming. We should have chi ed the ice out of the bird bath and had n randy. Something should have been done about that surly brook, too. He must have thought it uncordial, growling darkly like that and showing those sharp little teeth along the edge. A oother week or so and we should have had it as tame as a puppy.

But when a fellow drops in unexpectedly like that, he must expect to take things
as they are. Perhaps he thinks folks are
funny. Folks wonder about him, too. They
reer out of their windows when he goes by
and wonder if that red vest is warm enough,
if he brought his wife with him, or if she's
coming later. Perhaps he came up ahead to
look over the old homestead and see if it's in
need of repairs. Maybe he's got a war job,
pulling worms out of victory gardens.

Anyway, he's here. Oh, who is he? Why, the First Robin, of course:

## WARNING

### CANADA FACES A WOOD-FUEL FAMINE NEXT WINTER

ARE YOU one of the Canadian householders who burned fences, doors, and even flooring to keep warm in this winter's sub-zero weather?

Or perhaps you are one of the lucky ones who just managed to scrape

In either case, you will want to be prepared for next winter when greater hardships loom unless you tal. immediate action.

The shortage already has affected many communities . . . total stocks of dry wood are nearly exhausted . . . in some places the small supply of green wood cut for next winter is being used now to meet the present emergency.

Throughout most of Canada, fuel-wood is obtained not far from where it is consumed. Its production and distribution are the business of local citizens.

The Dominion Government recognizes that the wood-fuel shortage is so serious that even with the full co-operation of everyone in affected communities an adequate supply is not assured. Accordingly, it has been decided to stimulate the output of wood-fuel by assisting those normally engaged in its production and distribution. To this end, the following measures will be adopted:

- A subsidy of \$1.00 per cord will be paid to dealers on all commercial fuel-wood contracted for and cut on or before June 30, 1943, and held to dealers' account on that date.
- 2 The Coal Controller has been authorized to arrange in his discretion for the payment of such portion of the transportation costs as he considers proper in respect of fuel-wood, particularly in cases where dealers, to procure supplies, find it necessary to contract for fuel-wood at locations outside the area from which they normally derive their supplies. In order to obtain any such reimbursement, dealers must obtain a permit from the Coal Controller before contracting for such supplies.
- 3 The Coal Controller will repurchase from dealers at dealer's cost all commercial grades of fuel-wood on which a subsidy of \$1 per cord has been said and which are still in dealers' hands as at May 31, 1944.
- Assistance will be given in providing priorities for necessary equipment.
- Farmers now on the farm and who leave the farm temporarily in response to this appeal o engage in fuel-wood cutting, will be deemed by National Selective Service to be carrying out their regular occupation as farmers and will be given all the rights of deferment of military service which such an occupation now carries. Such supporary absence should not however, interfere with agriculture production.

Municipal councils, farmers, fuel dealers, individual citizens, service clubs, and all other groups in communies where wood-fuel is burned, are urged to begin at once a rapid survey of their local situation, and to take immediate action to relieve the shape.

### From Baseburner To Big Guns

Remember the mica doors and windows in Grandma's baseburner stove? That mica probably was mined in Ceylon or Madagascar. After Grandpa had the furnace put in, there didn't seem to be much use for mica, so we nearly forgot there were actually large deposits in Ontario.

Mica has valuable uses in the manufacture of war supplies, and section, in which we are permitted with the second Great War thundering not far over the skyline, Justin Purdy was lucky enough to stumble on a large crystal of mica in the bush near the village of Eau Claire late in 1941. ### Christ In The Upper Room With His Disciples

John 13:12-20; John 14:1-6

GOLDEN TEXT

Jesus saith unto him, I am the way, the truth and the life: no man

#### The Historical Setting

It was in the upper room, as they were keeping the feast of the passover, that the affecting scene of the feet washing took place. The Communion of the Lord's supper was instituted after this, and the instructions given in the later chapters, some in the house, and some on the way to Gethsemane,

#### An Approach to the Lesson

The thirteenth to the seventeenth chapters of John form a complete to get a close-up vi. of Our Lord's last hours with His Disciples before going to the cross. We are permitted to listen as He unfolds precious things, hitherto un-Father in His great High Priestly prayer, and of that intercession for ing for His people is that of our dience to His word. His present ministry as our advocate (1st John 2:1), sustains and restores us when failure comes in. His return is our hope and encouragement.

The Heart of the Lesson

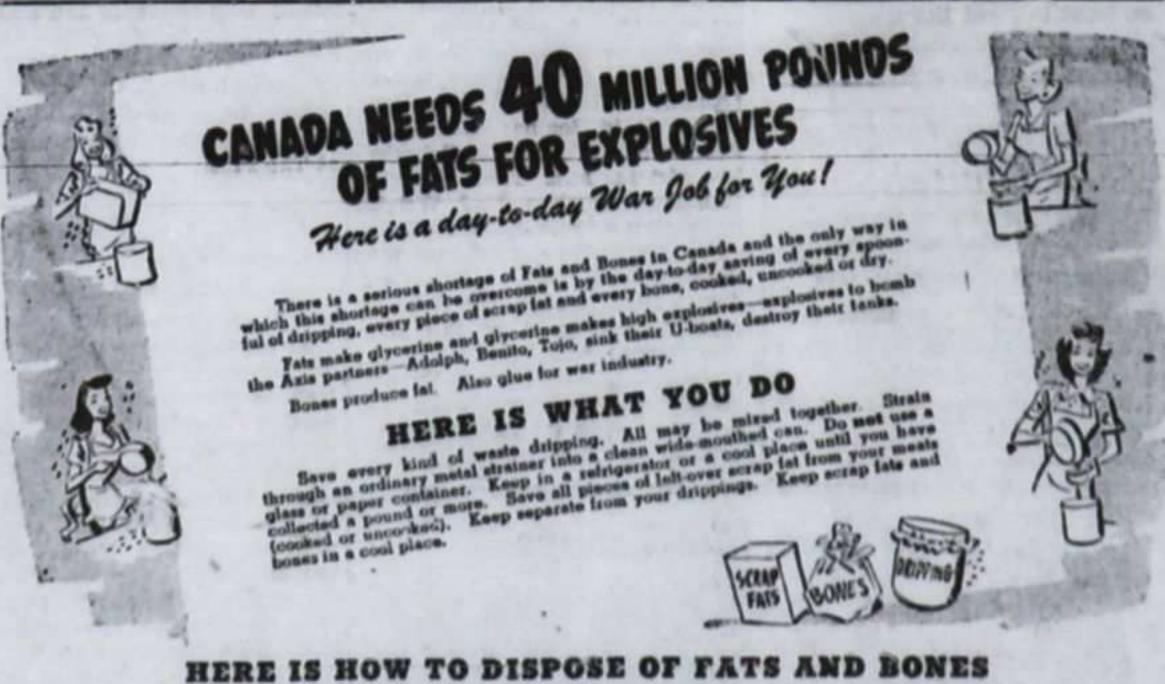

The heart of the lesson is in the golden text, an appropriate illustration of which is given of a traveller in the sothills in the far West, when he cour ry was wilder than it is now, haited a rancher in that region, and arred him the trail to a certain town. There's a he o' trails you can take, respo the rancher, out there's only one that will get you there. The others only go a little way and then get lost in the brush. Take this one and you'll get there. The words have an almost literal force as applied to the Salvation Jesus Christ came to bring. A bewildered world is inquiring the way to Heaven Jesus said, 'I am the way, tollow me.". Many "trails" go part way; only one arrives.

An Application

parts of Canada, Interior provinces are likewise well supplied with mobile surgical units and emergency hospitals.

To the uninitiated, a mobile surgical unit is a collection of surgical equipment complete enough to permit a doctor to handle almost any major operation in caring for injured civilians. It is packed in cases small enough to be handled by two men and can be transported to the scene of any disaster and set up in the shortest possible time and with a minimum of effort. Mrs. Hill and her baby had just arrived by train at the Beamsville station from her former home at Trenton. Her husband is an employee of C. H. Prudhomme nursery, and another nursery employee Mr. Routenberg, was waiting to take her to her home at Vineland.

The passenger train had left the station, and the small truck was crossing the tracks when a freight train, following close behind the passenger train, struck the truck and carried it about 200 yards down the track. The small truck was completely demolished. It is believed that blowing snow obstructed the driver's view of the railway.

### Tabulate Farm Aid In The County

Questionnaires Have Been Sent Out to Fruit Growers And Farmers - Should be Answered Immediately.

Approximately four thousand questionnaires were forwarded last week from the St. Catharines Selective Service office to farmera of the county, requesting information as to the number of men and women required for work on the individual farms.

In the local agricultural labor, problem, there are two types of help. The steady, experienced help hired by the month, remains with the farmer during the entire year, while the seasonal work, such as haying, harvesting, picking and packing fruit, requires a specific number of helpers for the short season the work is in progress.

The Selective Service office has, therefore, a dual problem. While assisting in whatever manner possible, it is not in a position to cope with the entire seasonal-work situation and the Farm Service force has assumed the responsibility

It is felt, however, that the supply from this source will not be sufficient and other help must be found. A number of men, now in alternate service work camps are experienced farmers and, in certain instances, there is a possibility that such men will be placed on farms. ### BUS TRAVELLERS

Since war started bus travel has increased over 200%. During this time Canada Coach Lines has endeavoured to cope with the situation in every possible way until now our facilities have been strained to the breaking point. We are unable to get new equipment; repair parts are difficult to obtain;

shortages and restrictions are hampering operations and overcrowded busses are slowing up schedules. In view of these conditions our schedules cannot be expanded further. In fact they have to be reduced in order that our busses can have time to be properly serviced and overhauled.

Due to these critical conditions we are forced to resort to the following drastic regulations in order that essential bus travellers may be accommodated and gasoline and rubber saved. Please observe them closely and co-operate in orier that you may not be inconvenienced by being forced to wait for several hours or longer to get on a bus:

### Shoppers and Other Non-Essential Travellers

Must Travel Between 9 a.m. and 4 pm. A great deal of our congestion is caused by women coming into town to shop or attend shows and waitor workers and other essential travellers will get ing until rush hours to return home. From nowon priority. Non-essential travellers not on busses before 4.30 p.m. may have to wait until 7.00 p.m. until the rush is over to get home.

LADIES-This is one way you can co-operate and help the war effort. Do your travelling beween 9.00 a.m. and 4.00 p.m., when there are seats a milable for you.

Our biggest traffic peak is on Sunday nights. In order that members of the Armed Forces may have full advantage of their week-end leaves, they will get priority after 8.00 p.m. departures on Sunday nights. Civilians should be on their way home before 8.00 p.m., otherwise they may not be accommudated Sunday night at all and may have to wait until Monday morning. Extra busses will not provided after 8.00 p.m. to accor modate civilian pas-
